Employee Profile

Senior Full Stack Developer / Technical Lead

Location: Ankara, Türkiye

Experienced Senior Full Stack Developer with over 5 years of experience in designing and implementing scalable web applications. Specialized in Java/Spring Boot, Kafka, React.js, and Kubernetes, with a strong background in banking and defense industry projects. Proven record of technical leadership, architectural ownership, and team management across enterprise-level initiatives.

Full Stack Web Development

Technical Leadership & System Architecture

Microservices Design & Distributed Systems

CI/CD Automation, Cloud Deployment, and Monitoring

Team Mentorship & Stakeholder Communication

Qualifications and special focuses

Project Roles	Technical Lead, Senior Software Developer, Mentor for junior developers
Technical Skills	Languages: Java, JavaScript, TypeScript, SQL Frameworks: Spring Boot, React.js, Hibernate, JUnit, Mockito Messaging / Caching: Apache Kafka, Redis DevOps / Tools: Docker, Kubernetes, Git, Jenkins Other: REST APIs, Microservices, CI/CD, JSON, Grafana/Prometheus monitoring
Language Skills	English: Fluent (Speaking, Reading, Writing) Turkish: Native

Education

University	Istanbul Aydin University — B.Sc. in Computer Engineering
Course of Studies	*January 2016 – December 2020 | GPA: 3.76/4.00*
University	Państwowa Wyższa Szkoła Informatyki i Przedsiębiorczości w Łomży (University of Łomża Exchange Program in Computer Science
Course of Studies	February 2018 – June 2018 | GPA: 5.0/5.0

Project / Service Experience

Project Timeframe: June 2025 – Present

Role: Senior Software Developer **Industry:** Banking

Technical Skill: Back End Development **Project Category:** Development

Description: Akbank MBB – ExternalIntgBatch Project

- Designing, developing, and maintaining Java/Spring Boot based microservices for Akbank's corporate modernization program.
- Managing Kafka-based event streaming and optimizing data flow for high-load, mission-critical services.
- Collaborating with business analysts, architects, and cross-functional teams to deliver scalable and resilient solutions.
- Supporting production operations on Kubernetes, ensuring service availability, fault tolerance, and observability.
- Participating in sprint planning, code reviews, and performance tuning activities.

Project Timeframe: June 2024 – June 2025

Role: Senior Software Developer **Industry:** Banking

Technical Skill: Full Stack Development **Project Category:** Development

Description: Garanti BBVA – CRYPTECH / ARK

- Implemented secure REST APIs and Kafka-based event systems, increasing message throughput and reliability.
- Led debugging sessions, production root cause analysis, and applied performance optimizations.
- Provided mentorship and code review support to ensure adherence to best practices.

Project Timeframe: August 2020 – June 2024

Role: Technical Lead / Full Stack Developer **Industry:** Defence & Aerospace Industry

Technical Skill: Full Stack Development **Project Category:** Development

Description: Aselsan – YAKUD Project

- Acted as technical owner of the YAKUD system, designing its complete architecture, infrastructure, and deployment pipeline from scratch.
- Led a 4–8 member cross-functional team, coordinating backend, frontend, and integration development efforts.
- Oversaw full SDLC — from requirements and design to development, testing, CI/CD, and production rollout.
- Implemented Spring Boot microservices and Kafka-based asynchronous communication ensuring scalability and reliability.
- Developed the React.js frontend for system management and real-time visualization tools.
- Designed and maintained CI/CD pipelines, enforced coding standards, and introduced code review practices adopted across other Aselsan teams.
- Conducted architecture reviews, sprint planning, and performance audits to guide the development roadmap.
- Delivered technical presentations and progress briefings to senior Aselsan executives and stakeholders.
- Personally managed deployment, configuration, and environment setup for both testing and production systems.
- Recognized for transforming YAKUD into a scalable, maintainable enterprise-grade system utilized by multiple Aselsan departments.

Project Timeframe: July 2021 – June 2024

Role: Full Stack Developer

Industry: Defence & Aerospace Industry

Technical Skill: Full Stack Developer

Project Category: Development

Description: Aselsan – SCOPE Project

- Contributed to backend development using Spring Boot and Kafka for reliable data exchange between distributed modules.
- Supported service integration, system interoperability, and microservice optimization.
- Collaborated closely with the YAKUD team to align architectures and ensure cross-platform consistency
